

# Introducing the Apollo 3 Digital Bell Carillon

*Programmable, top quality sound at the touch of a finger.*

## About Us

Since 1982, our founder, Ken Neill, also known as both "Ken the Bell Man" and Ken the Clock Guy," brings a wealth of knowledge and experience to meet your specific needs. As an accomplished musician, Ken brings both creative and technical experience to every job.

Our seasoned team is ready to meet your project needs, both large and small, including new construction, or maintenance and repair of carillons, clocks, and bells.

## One Call Covers It All

Our services include repair, restoration, maintenance and installation of the following:

- Cast Bronze Bells, Bell Towers, Bell Ringing Equipment
- Clock Towers, Street Clocks
- Carillons and Church Chimes
- Professional Rigging

## Guarantee

**OUR GOAL IS YOUR COMPLETE SATISFACTION.** No matter the size of your project or sound needs, our company teams will serve you in a courteous, professional manner.

## Digital Sampling

The Apollo 3 captures the true sound of tuned cast bronze bells, digitally producing a higher quality sound than previously available in a very easy to use

package. The commercial grade amplifier supplies up to 300 watts of power into existing or new speakers.

*Cast bronze Paccard automatic swinging bells with strikers.*

## The Apollo 3 Touch Screen

Operated from a 6 by 4 inch digital touch screen display for easy access of manual functions and programming of the automatic functions which include:

- Westminster Hour Strike
- Funeral Toll
- Wedding Peal
- Call to Worship
- Includes Hymns for All Seasons

# The Apollo 3 Digital Bell Carillon is Ready to Fill Your Bell-Ringing Needs.

## Additional System Features

- The full range of 61 Bells can be played live from an organ or a portable keyboard through a MIDI interface.
- Operate up to 8 bell strikers or swing motors in addition to the digital Carillon functions
- Store up to 1000 hymns which can be edited into any play list.
- Option to record your own music that can be stored for later playback.
- A four-function wireless remote control is an available option for manually starting the Toll, Peal, or Hymns.
- Tower Clock movements are controlled by minute impulses. The system automatically resets the clock hands after power failures and for seasonal time changes.

- Clock back-lighting can be programmed for automatic on-off schedule.
